

Rationale

The Board of Directors recognizes that the activities in which students are expected to participate are many and varied from the point of view of classroom instruction, general school organization, and extra-curricular programs. The principal and staff of each school, collectively and individually, are expected to acquaint all students with their expectations regarding behaviour and conduct in all school situations.

Policy

The general expectation of the Board of Directors is that the professional staff, collectively and individually, will establish school and classroom procedures which will achieve an orderly, safe and healthy atmosphere of learning for all students.
